PROPOSED AMENDMENTS TO PART THREE RULES

LD-1, 302.2.2A Long Distance Committee p. 68 Modify

Committee Action: Recommended for Adoption

HOD Action: Adopted Adopted as Amended Defeated

302.2.2 Water Conditions

A Water Temperature

- ~~(1) A swim shall not begin if the water temperature is less than 16 degrees Celsius (60.8 degrees Fahrenheit), unless heat-retaining swimwear is required of all swimmers or a USMS-approved thermal plan is in place.~~
- ~~(2) A swim in which heat-retaining swimwear is required of all swimmers shall not begin if the water temperature is less than 13.9 degrees Celsius (57 degrees Fahrenheit) unless a USMS-approved thermal plan is in place.~~
- ~~(3) A swim of 5 kilometers or greater shall not begin if the water temperature exceeds 29.45 degrees Celsius (85 degrees Fahrenheit). A swim of less than 5 kilometers shall not begin if the water temperature exceeds 31 degrees Celsius (87.8 degrees Fahrenheit).~~
- (1) Water temperature is below 16 degrees Celsius (60.8 degrees Fahrenheit): The swim may proceed if a USMS approved cold-water thermal plan is in place.
- (2) Water temperature is greater than 16 degrees Celsius (60.8 degrees Fahrenheit) and less than 25.6 degrees Celsius (78 degrees Fahrenheit): The swim may proceed with no restrictions.
- (3) Water temperature is greater than 25.6 degrees Celsius (78 degrees Fahrenheit) and less than 29.45 degrees Celsius (85 degrees Fahrenheit): The swim may proceed if heat-retaining swimwear is not permitted.
- (4) Water temperature is greater than 29.45 degrees Celsius (85 degrees Fahrenheit) and less than 31 degrees Celsius (87.8 degrees Fahrenheit): The swim may proceed if heat-retaining swimwear is not permitted and a USMS approved warm-water thermal plan is in place
- (5) Water temperature is above 31 degrees Celsius (87.8 degrees Fahrenheit): The swim may not proceed.

Rationale: New (1) removes an inconsistency between old (1), which requires heat-retaining swimwear and a thermal plan below 16 C, and old (2), which only requires a thermal plan below 13.9 C. New (1) removes the requirement for heat-retaining swimwear between 13.9 C and 16 C. This also changes the name of the thermal plan to “cold-water thermal plan”.

New (2) defines the temperature range for which there are no requirements for heat-retaining swimwear or a thermal plan.

New (3) and (4) establish requirements for a warm-water thermal plan and temperature restrictions on heat-retaining swimwear in warm water.

New (5) establishes a maximum temperature above which swims cannot be held.

Old (3) is replaced by new (3), (4), and (5).
