

**Alperen Eken** serves as Senior Manager, Global Stakeholder Engagement at ICANN, having previously worked in the organization's Policy department. His history with ICANN dates back to his time as an ICANN58 Fellow. Eken brings a diverse background spanning the corporate, entrepreneurial, and civil society sectors. His experience includes serving as a process engineer at QNB Finansbank, co-founding and leading the hospitality-tech startup Cello, and chairing the Co-Opinion Network to address youth

unemployment. An alumnus of Istanbul Erkek Lisesi, Alperen holds a BA in Politics & International Relations from Bogazici University and an MA in Conflict Management and International Economics from Johns Hopkins University SAIS.

**Alyssa Quinn** is currently a stay-at-home mother and serves in the ICANN ecosystem as an elected representative for the American Registry for Internet Numbers on the Address Supporting Organization Advisory Council.

Quinn has spent her career working on Internet governance issues. She previously worked at the Canadian Internet Registration Authority (CIRA) from 2018 to 2022, serving as their Policy Program Manager, where she coordinated CIRA's engagement at ICANN, government relations, and handled interventions in relevant regulatory and legal processes. While at CIRA, she also performed the secretariat functions for the Canadian Internet Governance Forum. Prior to joining CIRA, Alyssa worked as the Policy and Strategy Advisor at Cybera in Calgary, Alberta. Cybera is Alberta's non-profit research and education network, serving government, K-12 schools, and post-secondary institutions. Alyssa served in a volunteer capacity on the ARIN Advisory Council from 2016 to 2022. She also sat on the Board of Directors for the Canadian Internet Society chapter and the Montreal Internet Exchange. She

holds a Bachelor of Arts (Honors) in Political Science from Carleton University (2014). Alyssa now resides in the Seattle area with her family.

**Jenifer Lopez** is the current manager of NIC Panamá, the organization responsible for managing Panama's country code top-level domain, .pa. She also serves as one of the Latin America and Caribbean Councillors to the Country Code Names Supporting Organization, where she represents the region in discussions on country code top-level domain policy and Internet governance. Through her work with NIC Panamá and ICANN, she supports the secure and stable operation of Internet infrastructure and promotes collaboration

across the regional and global Internet community.

**Kathleen Scoggin** is a Research Assistant with the Stimson Center's Cyber and Partnerships in Proliferation Prevention Programs. Her professional and academic work has covered topics such as the global Domain Name System, the rise of autonomous weapons systems, data privacy, and the spyware market. **Scoggin** is an elected North American delegate to the At-Large Advisory Committee at the ICANN and a member of the organizing team for the North American School of Internet Governance . She is a former Youth Ambassador with the Internet Society, Fellow with the

American Registry for Internet Numbers, and Junior Fellow working with the International Telecommunication Union.

Kathleen graduated magna cum laude with a Bachelor of Arts in International Studies and a minor in French from American University. Kathleen is fluent in French and certified in French-English translation.

**Tara Whalen** is Privacy Lead at the World Wide Web Consortium (W3C). Whalen previously worked as a privacy engineer in industry roles at Cloudflare, Google, and Apple, and as an IT Research Analyst at the Office of the Privacy Commissioner of Canada. She conducted post-doctoral research in computer security at Carleton University, after receiving a PhD in computer science at Dalhousie University, and obtained a Master of Laws (Concentration in Law and Technology) from the University of Ottawa. Tara has

over 25 years of experience in the information security and privacy fields, including roles in research labs, academia, federal government institutions, and the private sector.
