Building an AI Teammate for Open Source

Abhijay Jain, AAIF-GOOSE

Hey Abhijay,
have you tried
this new thing
called Goose?

Tried it. Loved it.
Became my AI teammate.

What Goose offers

Open Source

Custom instructions

Free-form rules appended to every review prompt. Use them to nudge the bot toward what your team actually cares about.

Example: Don't flag TODO comments. Be strict on missing tests. Treat any change under `crates/goose/src/security/` as critical.

These instructions are appended verbatim to the system prompt the review orchestrator sends to the model.

General **Configure** Analytics Connectors

Code review

Configure when and how Goose Bot reviews pull requests.

When code review is on, Goose Bot automatically reviews pull requests and leaves inline suggestions. Mention @goose-bot in any PR comment to ask a question, request a manual review, or apply fixes.

Personal auto review preferences

All your pull requests in a Goose Bot-enabled repository will be automatically reviewed.

Personal review trigger preference

Choose when Goose Bot should automatically review your pull requests.

On PR open

Review output style

How findings are posted back to the pull request.

Inline + summary

Minimum severity to surface

Findings below this rank are dropped from the review. Higher = quieter.

Medium (default)

Review model

Which model the review orchestrator uses. Defaults to the model goose is configured with.

Use Goose's default model

Permissions

Control who can interact with @goose_bot and what it is allowed to do

Is there a "Project" or "Space" equivalent in Goose Chat Desktop app? Trying to figure if I can provide context files, custom instructions etc to Goose and then ask question about those.

hey lads, a question, unsure if this is the correct channel for it though.

So as per my understanding, goose runs in your machine, does that also mean the data

does goose with openai subscription use the

[goose/crates/goose/src/acp/provider.rs at main · aaif-goose/goose](#)

an open source, extensible AI agent that goes beyond code suggestions - install, execute, edit, and test with any LLM - aaif-goose/goose

Carine B (BE - CET TZ) HONK 04/05/2026, 14:25

@Goose Ask AI Bot how does codex know to 'summon' these skills ?

Goose Ask AI Bot APP 04/05/2026, 14:25

This is the key insight. Here's how it actually works:

Codex doesn't "know" to summon skills proactively — goose seeds the context for it. Here's the mechanism:

Two-stage process:

1. At session start — goose pre-loads skill metadata into the system prompt
