Humanizing Different Archetypal Expressions of
Gender Expansiveness

Carl Jung

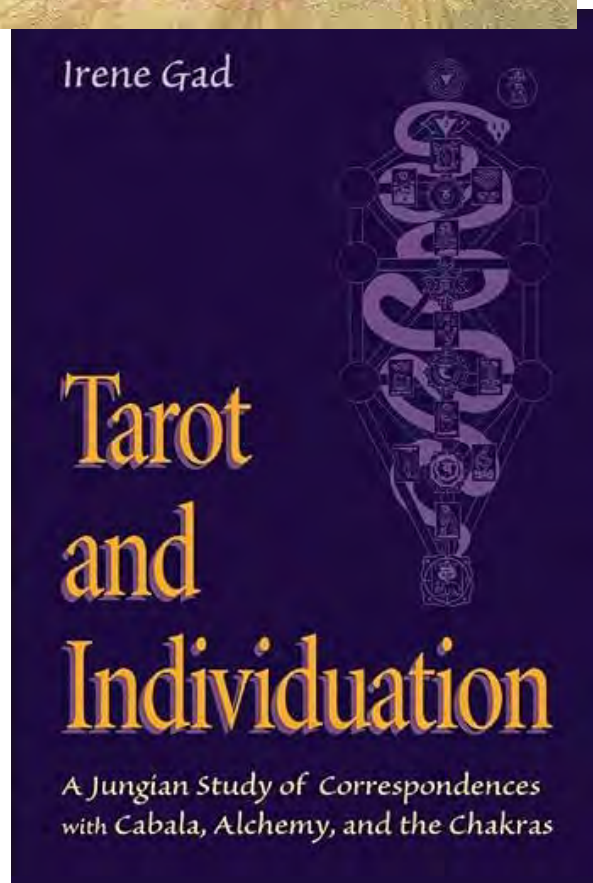

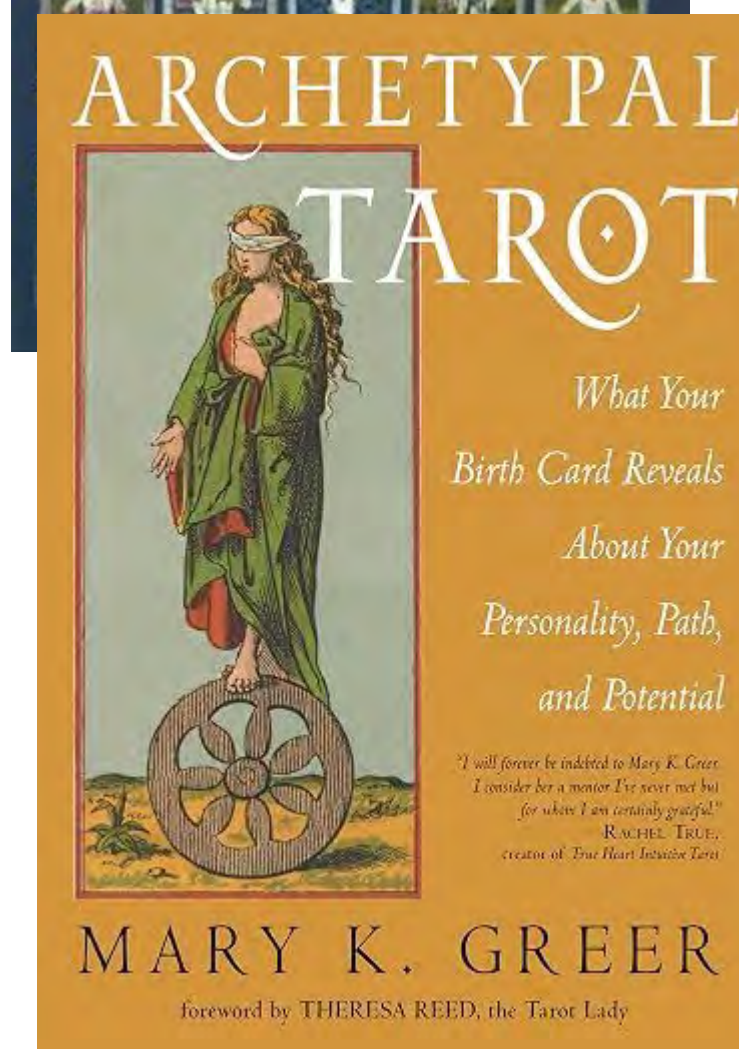

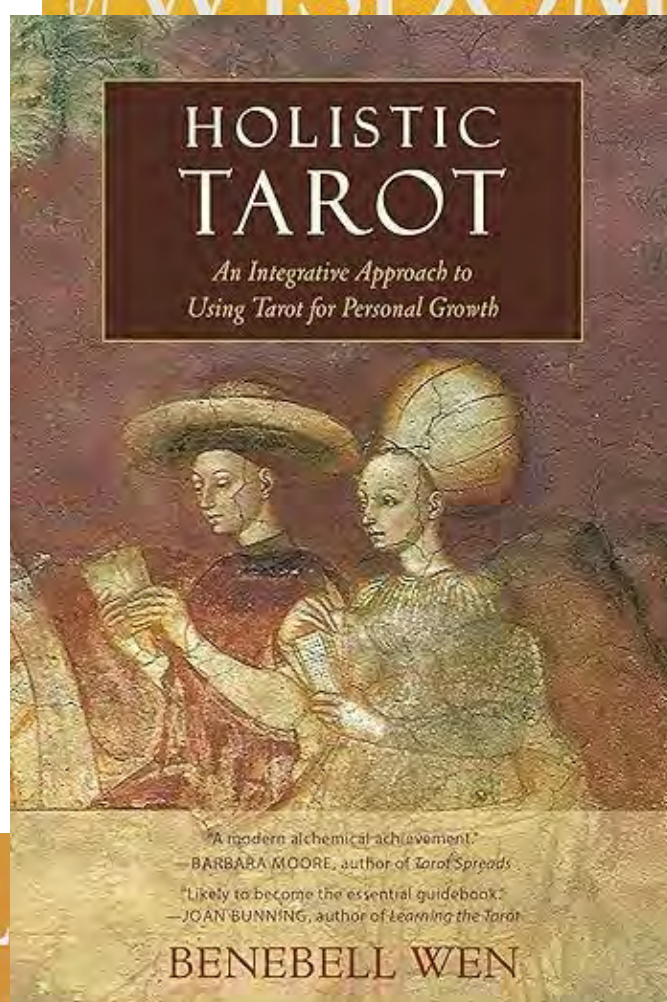

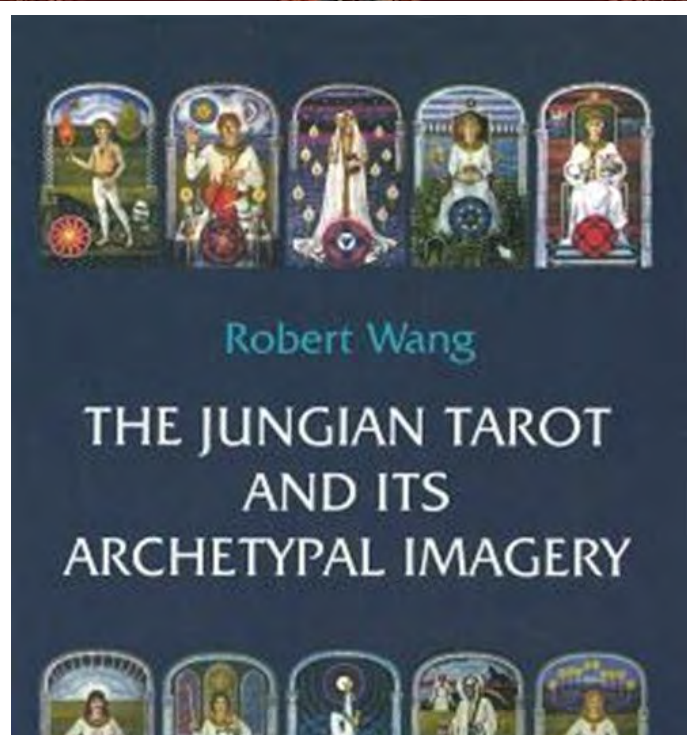

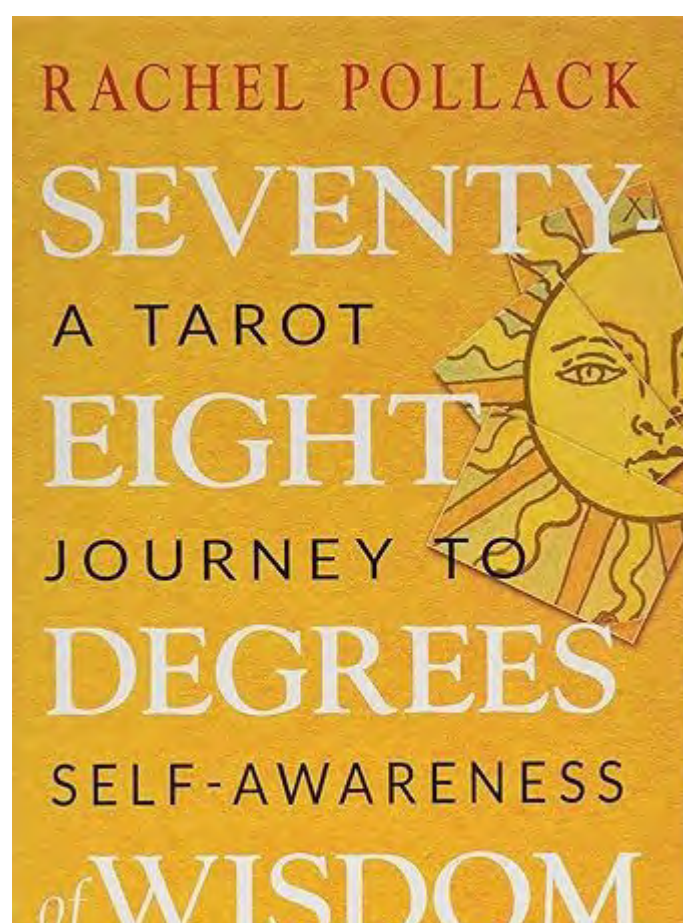

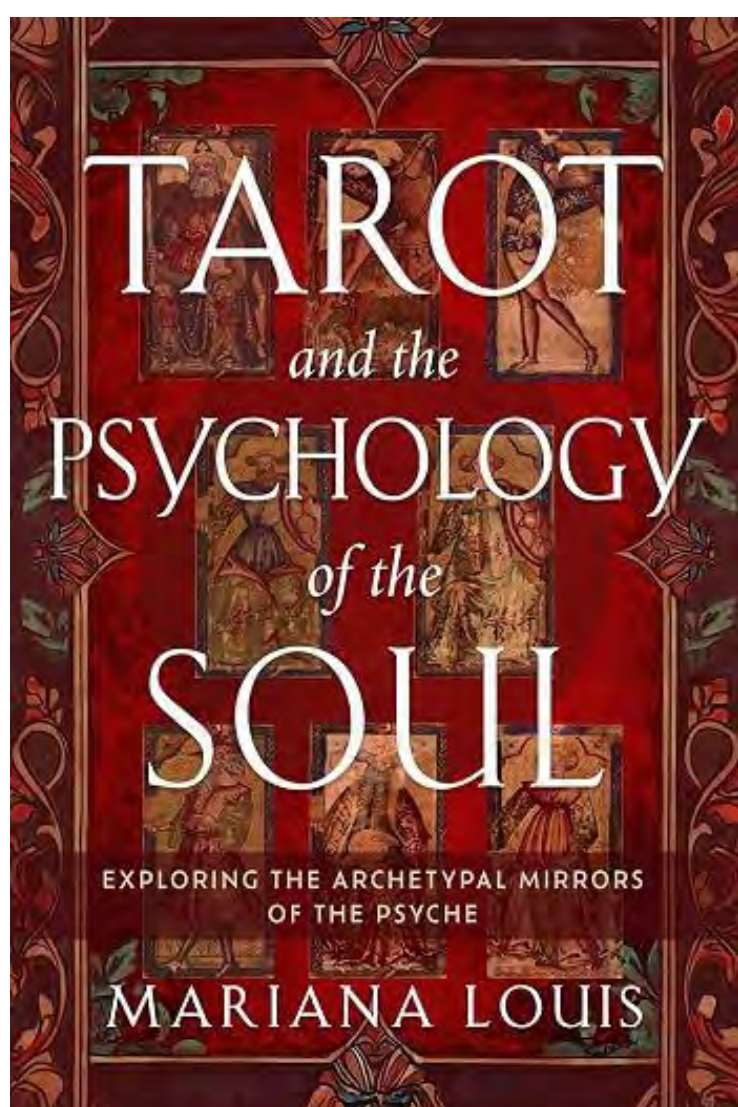

Jungian archetypes and the collective unconscious are key concepts in the field of analytical psychology, founded by Swiss psychologist Carl Jung.

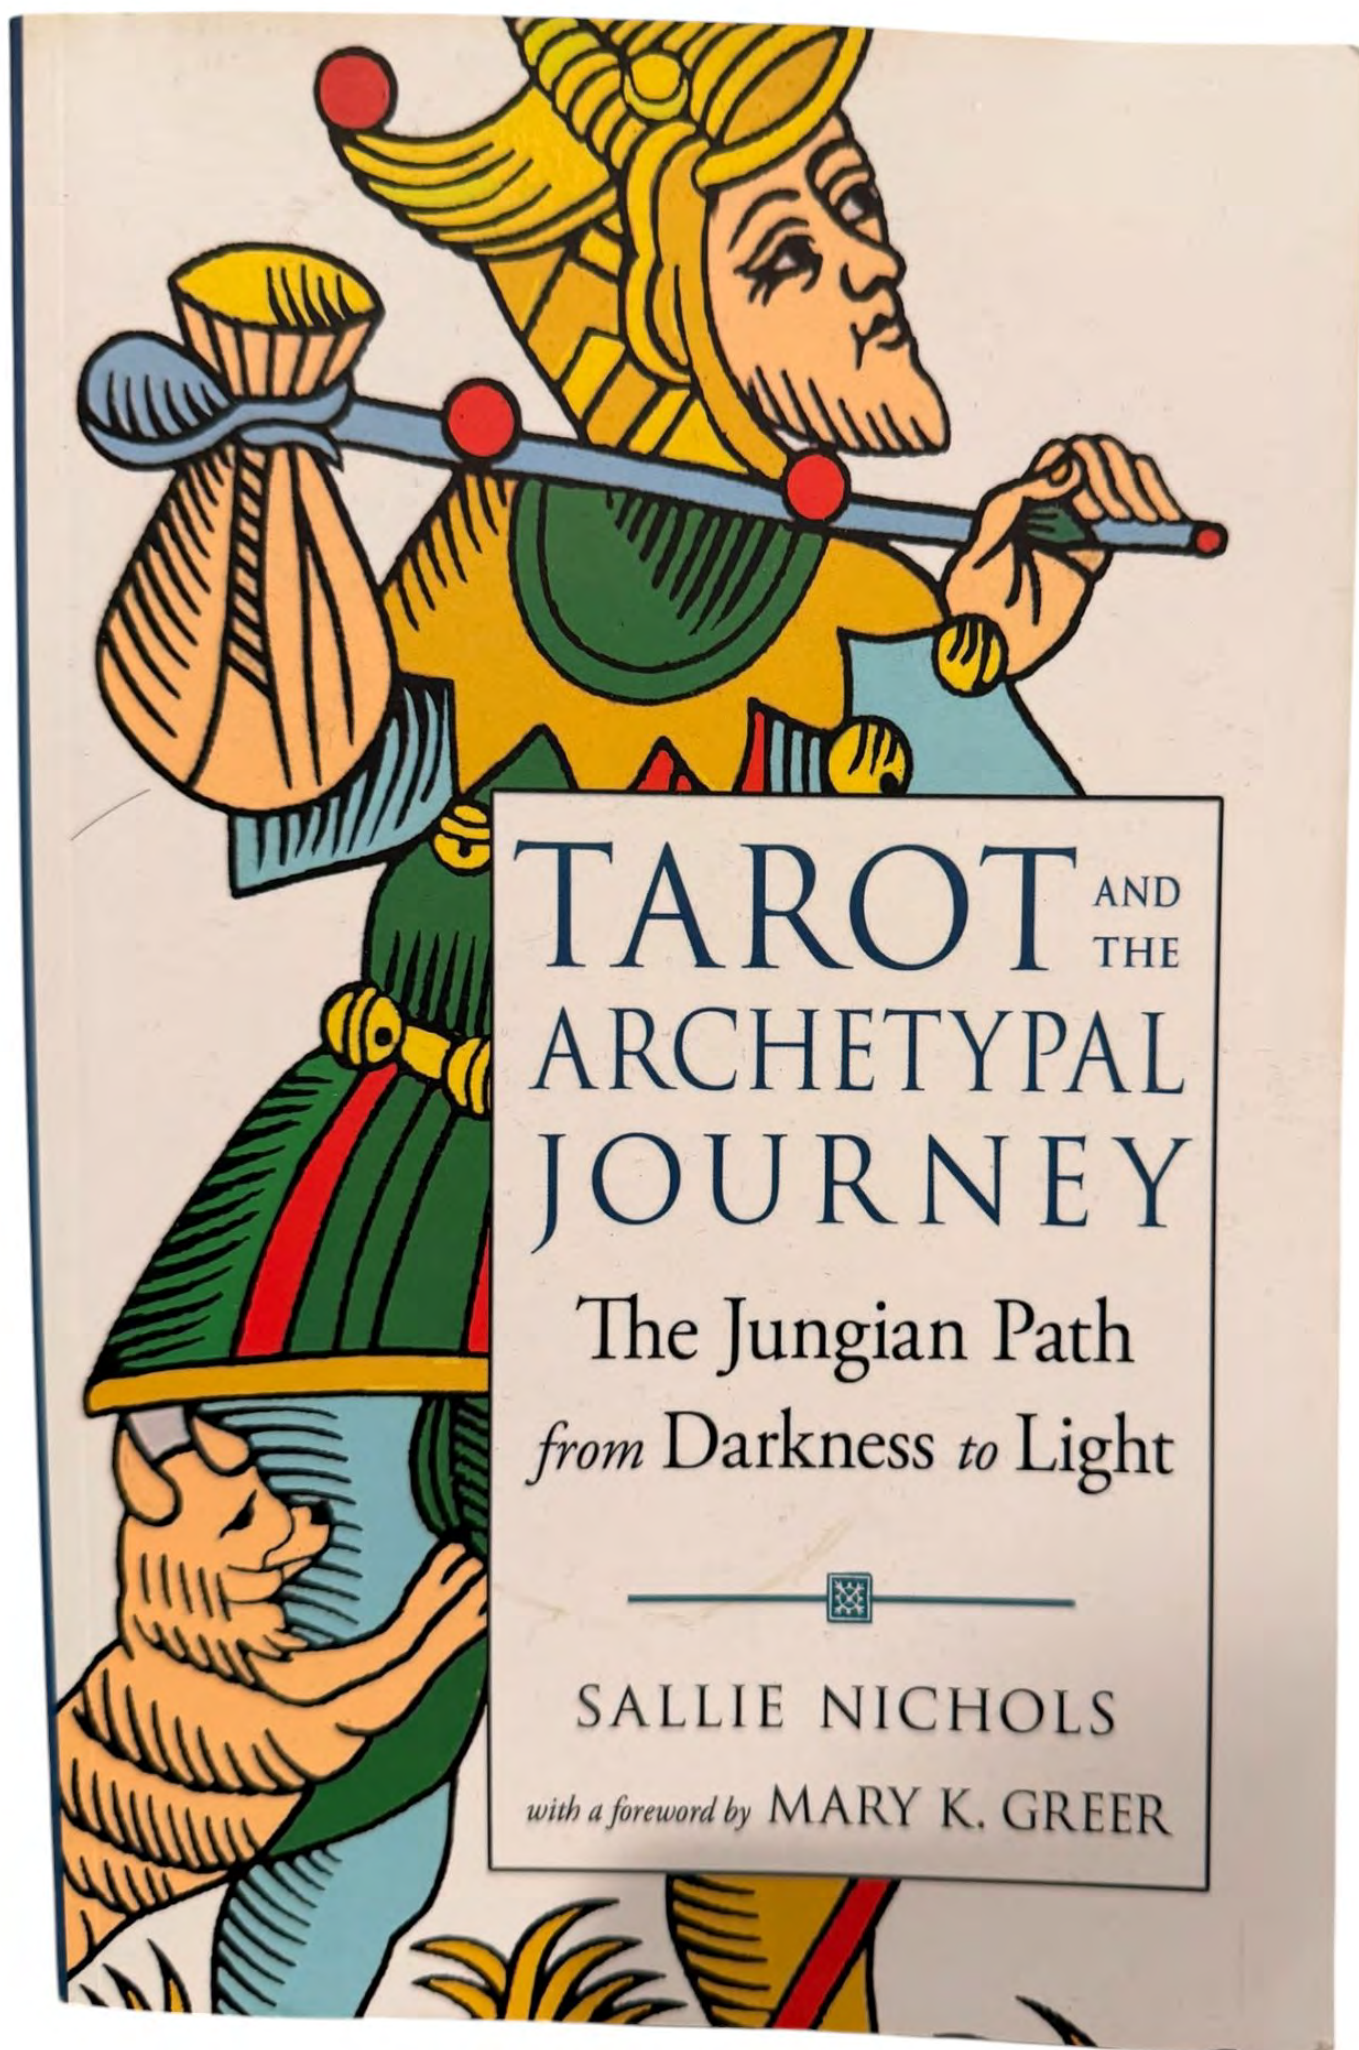

- Universal symbols and themes, eg the Mother, Child, and Hero
- The collective unconscious, a shared reservoir of memories and experiences common to all humanity.

Did Carl Jung read tarot cards?

No. However, he was deeply fascinated by tarot symbolism.

Today, many of Jung's concepts—such as the Shadow, the Anima/Animus, and the Wise Old Man—are widely applied to the tarot. To learn more about how his theories align with the Major Arcana, explore resources on Jung Platform or read community discussions on platforms like the r/Jung Reddit Forum.
