Step 1: Agree on the framing.

Already done.

But.

What you actually mean.

`build-deploy:dyad:mchen`

```
change.created  
build.started  
build.finished  
service.deployed
```

`build-deploy:spin-dev:ship-wreck-sa`

```
change.merged  
build.started  
testsuite.started  
testsuite.finished  
build.finished  
service.deployed  
service.published
```

The expected future past.

`build-deploy:dyad:mchen`

```
✓ change.created  
  build.started  
  build.finished  
  service.deployed
```

`build-deploy:spin-dev:ship-wreck-sa`

```
✓ change.merged  
✓ build.started  
  testsuite.started  
  testsuite.finished  
  build.finished  
  service.deployed  
  service.published
```

They choose.

`build-deploy:dyad:mchen`

✓ `change.created`
✓ `build.started`
 `build.finished`
 `service.deployed`

`build-deploy:spin-dev:ship-wreck-sa`

✓ `change.merged`
✓ `build.started`
✓ `testsuite.started`
✓ `testsuite.finished`
 `build.finished`
 `service.deployed`
 `service.published`

Hey AI. What if your future was declarative?

`build-deploy:dyad:mchen`

- ✓ `change.created`
- ✓ `build.started`
- ✓ `build.finished`
- `service.deployed`

`build-deploy:spin-dev:ship-wreck-sa`

- ✓ `change.merged`
- ✓ `build.started`
- ✓ `testsuite.started`
- ✓ `testsuite.finished`
- ✓ `build.finished`
- ✓ `service.deployed`
- `service.published`

What to do about it.

`build-deploy:dyad:mchen`

- ✓ `change.created`
- ✓ `build.started`
- ✓ `build.finished`
- ✓ `service.deployed`

`build-deploy:spin-dev:ship-wreck-sa`

- ✓ `change.merged`
- ✓ `build.started`
- ✓ `testsuite.started`
- ✓ `testsuite.finished`
- ✓ `build.finished`
- ✓ `service.deployed`
- ✓ `service.published`

```
notifyChannel()
```

The standard was waiting.

Function not implemented.

Events.

Expressions.

Functions.

Now it listens.

Choose.

Declare.
