Welcome...

Welcome - Hugging Face Safetensors

Safetensors joins the PyTorch Foundation as a hosted project

Safetensors minimizes security risks associated with model architectures and execution, providing developers with a trusted path to production.

Project Governance Just got Easier

OpenMVG (Minimum Viable Governance)

- Aligned with Linux Foundation vendor neutral policies
- Highly extensible and configurable
- Agentic installer (as well as Python and manual process)
- Covers all options and files necessary for complete project governance
- Works with any local code repo, Github and Gitlab
- Installs with any agent (including Claude Code, OpenAI Codex, OpenClaw...)

The background is a vibrant, abstract composition of various shades of purple and pink. It features numerous overlapping, curved lines and shapes, some of which are solid and others semi-transparent, creating a sense of depth and movement. The colors range from deep, dark purples to bright, almost magenta pinks. The overall effect is a dynamic and modern aesthetic.

Thank You!
