Professional learning **programs from Apple.**

Programs that meet educators where they are in their own learning journey and recognitions that honor innovative educators and schools from around the world.

Foundation

Apple Teacher

Apple Teacher is a free, self-paced professional learning program that equips educators with iPad and Mac skills and guides them to design engaging new learning experiences.

Integration

Apple Learning Coach

Apple Learning Coach is a free professional learning program that trains coaching educators to help teachers get more out of Apple technology.

Innovation

Apple Distinguished Educator

The ADE program is a global community of innovative educators who foster powerful ideas to improve teaching and learning with Apple products.

Here's what's **trending**.

Popular learning resources from Apple and from your education peers around the world.

Forum Resource (English)

Teaching with Mac Series

Part 1 of this series supports educators in using Mac for teaching.

Forum Resource (English)

What Can I Do with iPad?

Take a tour of some really cool features — like making movies with iMovie, creating podcasts, and a bunch more.

Learning from Apple

Record a Podcast

Learn how creating podcasts in GarageBand can empower student voice and enrich learning in any subject.

Learning from Apple

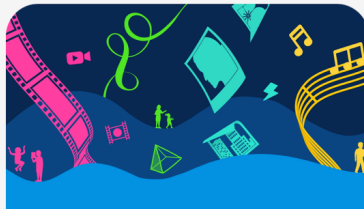

Create Pop Art

Learn how iPad and Apple Pencil can help each student capture ideas and express themselves in ways as unique as they are.

Explore more learning from Apple.

Continue exploring hundreds of free, Apple-created resources for professional learning at your own pace.

Creativity

Everyone Can Create

Everyone Can Create resources make it easier for educators to unlock student creativity and bring active learning to any lesson with iPad. See how creativity in learning can engage and empower your students.

Coding

Teaching Code with Swift Playground

Learning to code helps students build confidence and problem-solving skills. It starts with Swift Playground, the app that takes learners from their first line of code to building their first app.

Enhanced Learning

Augmented Reality

Give students new opportunities to explore their world with augmented reality (AR) apps on iPad. Every lesson becomes more personal and meaningful when students can interact with life-size and lifelike objects.

Frameworks

Challenge Based Learning

Challenge Based Learning is a framework created by Apple to leverage technology to address personal, community, and global challenges while acquiring content knowledge in areas such as literacy, math, science, technology, and the arts.

Join the **conversation.**

From basic questions to big ideas, the Community is where educators meet to connect and collaborate.

Teaching & Learning

Exchange ideas that spark learning — for you and your students.

Coaching

Connect with coaches supporting their peers through professional learning.

Leadership

Share challenges, insights, and solutions with peers in leadership.

Deployment & Management

Explore best practices and connect with technology managers and technical administrators.
