

ICE RESPONSE FRAMEWORK

Prevention/Awareness

- Host “Know Your Rights” workshops for families throughout the year
- Encourage families to complete a family preparedness plan
- Get familiar with policies surrounding this topic
- Train your staff on caregiver affidavits
- Workshops for staff to become informed, aware and better able to support students and families and keep schools safe
- Host school events inside school campuses for safety – usher folks in quickly
- Collaborate with families who may be impacted or fearful
- Brainstorm ways for students to safely get to and from school. “Carpool Club”, “walking bus”...
- Post clear signage at schools showing support for our immigrant community

During a Crisis

- Incident command team is activated – Principal, AP, Admin Assistant, counselor, mental health officer (PPSC)
- Notify key players (“community care team”) and send to family home or site of incident for immediate crisis support on the scene
- School staff – be prepared during a crisis to talk to students about what is happening, how they will be kept safe (consider confidentiality, developmental age of students)

Post Crisis Response

- Who else may need support in the community? (neighbors who witnessed, family, friends)
- School personnel including DSW reach out to family to assess for supports
- Collaborate with local organizations/agencies as needed
- Mutual aid – if families want we can share their needs
- Contact Communications Director for messaging to the community
